PROFESSIONAL SUMMARY

Software Engineer (M.Sc. Computer Science) with 10+ years of experience across the automotive, retail and telecommunications industries, working with Python, C/C++ and Linux through the full SDLC. Currently focused on applied AI, generative models, multi-agent systems, autonomous agent networks, and automated workflows designed for business automation.

PROFESSIONAL EXPERIENCE

Freelance Software Engineer & AI Builder — Mexico City | Oct 2025 – Present

- Building AI-powered sales platforms where multi-agent systems talk to customers and qualify leads using each company's own data through RAG, so sales teams can focus on closing.
- Integrated a chatbot and WhatsApp into client websites to receive customer inquiries, using Google Analytics to track traffic and conversions.
- Added Stripe/PayPal payments to a fundraising website for online donations.

Capgemini — Senior Software Engineer, Consultant (Automotive) | Nov 2019 – Oct 2025

- Delivered automotive software across the full SDLC using C, Python and Linux, including a headlamp "Showroom Mode" feature that ships in production Ford vehicles.
- Wrote 500+ software requirements for Renault's electric vehicle platform, after a 3-month on-site training in Porto, Portugal.
- Supported release quality through automated testing and peer code/design reviews with cross-functional teams.

Toshiba — Software Engineer I (Retail & POS) | Apr 2018 – Nov 2019

- Integrated Java and Python packages and third-party libraries into Linux-based POS platforms for retail clients.
- Customized a Firefox-based browser running in kiosk mode on the POS system and solved platform issues through root-cause analysis.
- Migrated test scripts from Python 2 to Python 3 and ran integration and regression tests with Pytest.

Continental (Aumovio) — Software Engineer (Automotive) | Nov 2015 – Apr 2018

- Developed C APIs and a Board Support Package (BSP) for CNH Industrial's construction and agricultural machines, covering power management and body control features.
- Reproduced and debugged critical instrument-cluster issues for Isuzu with profiling tools, during a 3-week on-site training in Villingen-Schwenningen, Germany.
- Delivered documented software releases to customers and supported the End-of-Line team in validating samples before series production.

Ericsson — Network Engineer (Telecommunications) | Mar 2013 – Nov 2015

- Reduced manual reporting work by automating daily KPI analysis with Python and Excel/VBA, helping Verizon Wireless launch LTE carrier aggregation for faster mobile data.

ACHIEVEMENTS & CERTIFICATIONS

- **Clara's AI Hackathon por México:** 3rd place (Oct 2026)
- **C++ Institute:** CPA – C++ Certified Associate Programmer (Dec 2023)
- **The Freescale Cup:** Worldwide Finalist, China 2013; 1st place National, Mexico 2012 | 1st place Regional, Mexico 2011

TECHNICAL SKILLS

- **Languages & Core:** Python, C/C++, JavaScript, TypeScript, SQL, Bash, Linux
- **Applied AI & Automation:** AI agents, multi-agent systems, RAG, MCP, A2A, Google ADK, agent skills and plugins, prompt engineering, n8n
- **AI Models & Tools:** Claude, Gemini, GPT, ElevenLabs, Firecrawl, Lovable, Antigravity, Devin
- **Web & Cloud:** React, Next.js, Tailwind CSS, FastAPI, Vercel, Google Cloud Run, cloud fundamentals (AWS, GCP, Azure)
- **DevOps & Tools:** Git/GitHub, Docker, Pytest, Jira, Agile

EDUCATION

M.Sc. Computer Science — Autonomous University of Guadalajara (UAG) | 2016 – 2018
B.S. Electronics and Communications Engineering — National Polytechnic Institute (IPN) | 2008 – 2012
