PROFESSIONAL SUMMARY

Software Engineer (M.Sc. Computer Science) with 10+ years of experience across the automotive, retail and telecommunications industries, working with Python, C/C++ and Linux through the full SDLC. Currently focused on applied AI, generative models, multi-agent systems, autonomous agent networks, and automated workflows designed for business automation.

PROFESSIONAL EXPERIENCE

Freelance Software Engineer & AI Builder — Mexico City | Oct 2025 – Present

- Enabling sales teams to focus on closing by building AI platforms where multi-agent systems talk to customers and qualify leads with each company's own data through RAG.
- Opened direct channels for customer inquiries on client websites, tracked with Google Analytics, by integrating a chatbot and WhatsApp.
- Enabled online donations for a fundraising website by integrating Stripe and PayPal payments.

Capgemini — Senior Software Engineer, Consultant (Automotive) | Nov 2019 – Oct 2025

- Shipped a headlamp "Showroom Mode" feature in production Ford vehicles, developed in C and Python across the full SDLC.
- Defined 500+ software requirements across 5 systems of Renault's electric vehicle platform, after a 3-month on-site training in Porto, Portugal.
- Improved release quality by running automated tests and leading peer code/design reviews with cross-functional teams.

Toshiba — Software Engineer I (Retail & POS) | Apr 2018 – Nov 2019

- Extended Linux-based POS platforms for retail clients by integrating Java and Python packages and third-party libraries.
- Delivered a custom Firefox-based browser in kiosk mode for the POS system, and solved platform issues through root-cause analysis.
- Moved the test suite to Python 3 by migrating scripts and running regression tests with Pytest.

Continental (Aumovio) — Software Engineer (Automotive) | Nov 2015 – Apr 2018

- Enabled power management and body control on CNH Industrial's construction and agricultural machines by developing C APIs and a Board Support Package (BSP).
- Helped resolve critical instrument-cluster issues for Isuzu by reproducing and profiling them during a 3-week on-site training in Villingen-Schwenningen, Germany.
- Prepared projects for series production by delivering documented software releases and supporting End-of-Line sample validation.

Ericsson — Network Engineer (Telecommunications) | Mar 2013 – Nov 2015

- Helped Verizon Wireless launch LTE carrier aggregation for faster mobile data by automating daily KPI analysis with Python and Excel/VBA.

ACHIEVEMENTS & CERTIFICATIONS

- **Clara's AI Hackathon por México:** 3rd place (Oct 2026)
- **C++ Institute:** CPA – C++ Certified Associate Programmer (Dec 2023)
- **The Freescale Cup:** Worldwide Finalist, China 2013; 1st place National, Mexico 2012 | 1st place Regional, Mexico 2011

TECHNICAL SKILLS

- **Languages & Core:** Python, C/C++, JavaScript, TypeScript, SQL, Bash, Linux
- **Applied AI & Automation:** AI agents, multi-agent systems, RAG, MCP, A2A, Google ADK, agent skills and plugins, prompt engineering, n8n
- **AI Models & Tools:** Claude, Gemini, GPT, ElevenLabs, Firecrawl, Lovable, Antigravity, Devin
- **Web & Cloud:** React, Next.js, Tailwind CSS, FastAPI, Vercel, Google Cloud Run, cloud fundamentals (AWS, GCP, Azure)
- **DevOps & Tools:** Git/GitHub, Docker, Pytest, Jira, Agile

EDUCATION

M.Sc. Computer Science — Autonomous University of Guadalajara (UAG) | 2016 – 2018
B.S. Electronics and Communications Engineering — National Polytechnic Institute (IPN) | 2008 – 2012
